PROFILE

Newly graduated Junior Software Engineer with a B.Sc. in Computer Science from Malmö University. I have a strong foundation in system development, object-oriented programming, and web technologies. My technical toolbox includes Java, C# .NET, SQL Server, JavaScript, HTML, CSS, and React. I'm passionate about building smart, user-focused solutions that solve real problems. I thrive in agile, collaborative teams and am always eager to learn, contribute, and grow with modern technologies.

EMPLOYMENT HISTORY

Teaching assistant at Malmö University, Malmö

January 2025 — March 2025

Guided students in solving programming tasks with a structured, problem-solving approach. Emphasized the importance of planning, including requirements analysis, system architecture, and UML diagrams.

Key Technologies:

- Java
- Object-Oriented Programming (OOP)
- UML (Class Diagrams, Sequence Diagrams)

Teaching assistant at Malmö University, Malmö

January 2024 — March 2024

Guided students in laboratory exercises and workshops on object-oriented programming, threads, and data communication.

Warehouse worker at Panduro, Malmö

June 2025

I drive a forklift in a warehouse and pick orders to be delivered to various stores.

Terminal worker at PostNord, Malmö

January 2023 — June 2025

At PostNord, I loaded products into trucks safely and efficiently.

Sales Assistant at ZARA, Malmö

June 2022 — August 2022

My main responsibilities included assisting customers in finding the right products, organizing clothing by color, and delivering excellent customer service in a fast-paced environment.

Public and Service at Malmö FF, Malmö

March 2019 — June 2022

At Malmö FF, I was responsible for ticket control, crowd monitoring, and ensuring order and safety among spectators during the matches.

EDUCATION

High school, NTI, Malmö, Malmö

August 2018 — June 2021

Bachelor of Science in Computer Science with specialization in Computer Systems Development, Malmö university, Malmö, Malmö

August 2022 — June 2025

The program provided me with a strong foundation in system development, programming, databases, and web technologies. I gained knowledge in software development at multiple levels of abstraction – from web services to system-level programming for hardware control.

Throughout my studies, I worked with various languages and technologies, including Java, C# .NET, SQL Server, JavaScript, HTML, CSS, and React. These projects helped me build a broad technical skillset and strengthened my problem-solving, collaboration, and agile development abilities.

I actively participated in several projects such as **Cariogram**, **MarketplaceX**, **BusCatcher**, **Health Center**, **Guess the Football Player**, and a **chat application inspired by Hotmail Messenger**. These experiences gave me hands-on knowledge of the full development cycle – from requirements analysis and system design to implementation and testing.
